J.P. Bowen and J.E. Nicholls (Eds.)

Z User Workshop, London 1992

Proceedings of the Seventh Annual Z User Meeting, London, 14–15 December 1992.

Price: UK £37.00 (£30.00 to BCS members).
Publication due: May 1993. ISBN: 3-540-19818-0. 360pp (approx).
Workshops in Computing series, Springer-Verlag.
Series editor: C.J. van Rijsbergen

This volume contains revised papers from the Seventh Annual Z User Meeting, held in London in December 1992. In contrast to previous years the meeting concentrated on industrial applications of Z, and attracted many participants from an industrial background. The resulting volume provides a comprehensive overview of current research into industrial applications of Z. There are four papers by invited speakers, three of which present different views on how formal methods are being introduced. The fourth compares the use of formal methods in several countries, including Canada and the USA. Other papers examine the industrial use of Z, including the key area of safety-critical systems. There are also contributions related to the collaborative ZIP project which has been researching into Z tools and methods, and developing a standard for Z.

Z User Workshop, London 1992 provides a comprehensive overview of current research into industrial applications of Z. It will provide invaluable reading for researchers, postgraduate students, and potential industrial users of Z.

Proceedings of the following Z User Workshops are also available in the series:

Z User Workshop, Oxford 1989	ISBN: 3-540-19627-7	£24.00 (BCS members £19.00)
Z User Workshop, Oxford 1990	ISBN: 3-540-19672-2	£26.00 (BCS members £20.00)
Z User Workshop, York 1991	ISBN: 3-540-19780-X	£29.00 (BCS members £23.00)
